

REX AUTOMATON CORP.

Production AI, automation and web systems for public and private organizations, with a person in charge of every decision that matters.

Edmonton, Alberta, Canada
www.rexautomaton.com

- OpenAI Select Partner
- Zapier Solution Partner

COMPANY OVERVIEW

REX AUTOMATON CORP. designs, builds and runs AI document extraction, automated decision support, retrieval based content engines and AI agents, connected to the systems clients already use. Every build ships with measured tests, data quality checks and human review built in. Operating since January 2023 and incorporated in Alberta in May 2026, with a registered office in Edmonton and work across Alberta and British Columbia.

CORE COMPETENCIES

Websites and web apps Next.js sites and web apps, intake and registration forms with prefill links, password protected staff portals.	AI agents and automation Document extraction, decision support, AI drafting with staff approval, built on leading AI models and mainstream automation platforms.
CRM and operations setup CRM setup and migration on mainstream platforms, data sync with duplicate detection, automated reminders.	Dashboards and data Role based dashboards, PostgreSQL databases, search over an organization's own documents, structured data from unstructured files.

PAST PERFORMANCE

- Forward Funding: AI underwriting** Montreal, QC · Small business lender
Reads emailed bank statements (native PDFs, scans, 90+ page packages), extracts each month to structured data and applies the lender's underwriting rules.
Result: deployed to production in January 2026, returning a written approve or decline analysis on real merchant submissions.
- Play Forever: grant application system** Toronto, ON · Youth sports charity
Extracts every question from a funder's page or PDF, drafts answers from the charity's own documents, and runs a staff approval and revision loop.
Result: a 78 question application drafted to staff review in about 26 minutes. Staff now run new applications end to end themselves.
- Crohn's and Colitis Canada: content engine** Toronto, ON · National health charity
Retrieval engine over the charity's own web pages and webinar transcripts that drafts cited articles for human review, with a gate that checks the sources can answer first.
Result: 11 of 11 live queries handled correctly against the production index (out of scope requests blocked, real topics allowed).
- Soft Pull Solutions: applicant intake platform** United States · Credit technology
AI parsing of inbound applications, consent PDFs, form builder with prefill links, and encryption of sensitive identifiers at rest.
Result: live in production, handling thousands of applications, with stored identifiers encrypted and verified (0 mismatches).

DIFFERENTIATORS

- Fixed fee per phase**, quoted in advance.
- Canadian data residency option:** Canadian hosted databases on request.
- OpenAI Select Partner** (OpenAI Partner Network, 2026).
- Zapier Solution Partner.**
- Responsible AI practice** aligned with the Treasury Board Directive on Automated Decision-Making: human review, measured testing, fail closed safeguards.
